PROJECTS

'+7 11.2016 – Jetzt
Bundesagentur für Arbeit, Nürnberg

Projekt Migora: Migration von Datawarehouse Modulen von Informix auf Oracle.

Oracle DB 12, ODI, Informix, PL/SQL, SQL.

'+6 03.2016 – 10.2016

abbvie

TCS/Abbvie, Ludwigshafen-am-Rhein

Cluster Lead in Outsourcing Projekt.

Fams, Isobella, Kaba, LuraTech, Kats, Mebedo, Offline Web, SDL Trados, Speedikon FM + C, WiriTech, Oracle Forms, Apex, DB12, PL/SQL, SQL.

'+5 12.2015 – 03.2016
Fichtner, Stuttgart

Personal System auf Oracle Apex migrieren.

Oracle 12, Apex 5, PL/SQL, SQL.

+4 08.2015 – 10.2015

DZB Bank, Frankfurt

Improving and enhancing Bank DWH reports.

Pentaho, JBoss, ETL, Datawarehouse, Confluence, Jira, XML, Agile, Oracle 11, PL/SQL, SQL.

+3 02.2015 – 05.2015
Total Gas and Energy, Stuttgart

Oracle Apex Developer

Developing a new centralized Datawarehouse Application.

Tasks:-

- Writing high and low level documentation:
High Level requirements
Functional Specification
- Technical Specification
- User Guide
- Test Plan.
- Writing ETL scripts in PL/SQL.
- Programming new APEX pages.

Oracle Apex 4.2, SQL Developer, Data Modeler, cvs, Virtual Machines for Development/Test, SQL, PL/SQL, Sharepoint 2007, Altlassian Jira 6.5, Intranet Wiki., XML, belvis, SuperOffice, Oracle IDE, Mongo DB.

+2 09.2014 – 01.2015

vodafone, Düsseldorf

Oracle Apex Developer

+1 04.2014 – 08.2014

Rohde and Schwarz, Munich

Oracle Consultant

0 08.2013 – 01.2014
Siemens, Munich

Oracle/OWB/Hana Consultant

SOX audits new requirements developments.

Tasks:-

- Writing new Oracle Apex pages to automate work flows and produce management reports.
- Extracting new server data sources.

Oracle [Apex](#) 4.2, SQL Developer, Web Services, cvs, Virtual Machines, SQL, PL/SQL.

- Satellite and Media-monitoring systems.
- Oracle Database run time speed improvements.
- Tasks:-
- Optimization of an existing do-it-yourself partitioning solution
- Optimization of the application logic (Java based)
- Coding in standard SQL and PL / SQL
- Creation of Oracle packages
- Creation of installation and update scripts (Microsoft Windows Batch)
- Performing tests including error analysis and correction
- Creation / preparation of application documentation
- DBA.
- Creating automated installation / upgrade software packages.
- Module test with multiple virtual machines.
- Software configuration management systems (IBM Rational ClearCase / IBM Jazz / RTC)
- Software Quality Assurance

Oracle SQL Developer, HTML, Oracle 9/10/11/12, PL-SQL, SQL * Plus, XML, DBMS_SCHEDULER.

Improving usability of the Buying Datawarehouse applications. Siemens presents all its financial purchases in a new SAP Hana Datawarehouse Front end. Our team gathers the monthly data from several (constantly-changing) SAP applications, transforms and cleans the data, and forwards it to the SAP Hana Spend Datawarehouse. My responsibility was to control and improve the OWB process flows, and develop new control procedures.

Documented data flows, data models, dependencies, and archived test plans.

Web Services, Oracle SQL Developer Data

-1 07 2012 – 03.2013

Credit-Suisse Bank
Zurich

Oracle Consultant

Modeler, (Erwin), Confluence Wiki, Oracle OWB, HTML, Oracle 11, PL-SQL, SQL * Plus, Oracle SQL Developer, [Apex 4.1](#), PL/SQL Developer, SVN, DBMS_SCHEDULER, Tortoise, XML, SAP, Hana.

Migration

- . Oracle 10g to 11, Informatica, Business Objects 7.2 to 7.3.
- . SWISS database and staging part from a legacy environment to the DWH platform
- . Informatica 7.14 Workflows to a standardised DWH platform operating on Informatica 8.6
- . Batch scheduling jobs running on a internally developed scheduling program to Control-M
- . Database objects on Oracle 10G to a standardised DWH platform operating on Oracle 11G
- . Feed transfers (Connect Direct / ftp) to the new platform (ftp)
- . Data transfer of the operational and reporting data from legacy database to new environment
- . Development of necessary changes on the application database / staging environment as a result of the migration
- . Deployment of the application parts using common change management (SWAN XP) and version control tools (Subversion)
- . Close collaboration with the application and platform responsible in Switzerland and Singapore

[Oracle Database 11, Powercentre Informatica Business Objects 7.3, MS Visio PL/SQL, SQL*Plus, Data Modeller SVN, Tortoise, Data Vault, SQL Developer](#)

-2 03 2012 – 07.2012

softwerker, Munich

Oracle Consultant

Maintenance of Oracle Forms applications and new development of Oracle Apex- and Open Source alternatives. Apex: sending e-mails, themes, templates, css, JavaScript, Plug-in dynamic actions, JavaScript code native action, SOAP/REST based web services, debugging with Firefox Add-ons.

Oracle Designer, Oracle Database 9i/10g, Oracle Forms, FoxOpen, XML
PL/SQL, SQL*Plus, Oracle Apex, Ajax, JavaScript, JQuery, HTML, SVN, Tortoise

-3 02.2011 – 03.2012

Siemens, Munich

Consultant, Programmer

Continuing development of financial dashboards and Reporting for all Siemens managers worldwide. Apex: heavy use of Authorisation Schemes, themes, templates, css, JavaScript, dynamic actions, JavaScript code native action, debugging with Firefox Add-ons. Heavy use of JavaScript for displaying information in Project 2. Implementation of security concepts against cross-scripting, etc.

HTML, Oracle 11, Oracle Apex, PL-SQL, SQL*Plus, SQL Developer, Ajax, JavaScript, JQuery, SVN, Tortoise, XML, SAP, ABAP, [BMC Remedy Action Request System](#)

-4 09.2010 – 12.2010

SBB, Bern, Switzerland

DB-Architect, Consultant

Migrations of:-

Oracle 8 to Oracle 11

de-central databases to a central database

clients from Windows 2000/XP to Windows 7

Responsibilities:-

- . show the advantages/enhancements of the Oracle database 11
- . data modelling with Oracle SQL Developer Data Modeller 2
 - logical data models
 - physical data models
- process models
- . data analysis
- . dimensional modelling
- . document and describe the new DBA-Features to t-systems (provider)
- . propose various migration methods
- . analyse the internal CA-Gen-Generator
- . identify potential bottlenecks/deadlocks
- . improve the SQL and PL/SQL Code
- . develop asynchronous update methods
- . create the external modules in a new internal database

Oracle 8 and 11.2, Computer Associates CG:Gen, SQL, PL/SQL, Packages, SQL Developer, SQL Developer Data Modeller

-5 04.2010 – 09.2010

Online language lessons

Web Analysis, Design, Programming

Language teaching over the Internet.

[Apache, XAMPP, Joomla, Skype, TalkAndWrite, webex, XML, DimDim](#)
[Google Calendar, ScheduleOnce, skype, TalkAndWrite, moodle, Joomla](#), TalkAndWrite, moodle, etc.

-6 11.2009 – 02.2010

KVB
Munich

Datawarehouse

Designer / Programmer

Creation of Datawarehouse reports, and administration with Apex.

Apex screens administered the reporting architecture.

Development of new Oracle Discoverer and OBIEE reports.

Oracle Discoverer was originally used for reporting on the Data Warehouse, but because of the need to use sub queries on both the requirements and the reporting, it was necessary to use OBIEE.

I was alone responsible for the creation of the logical model, the design of the dimensional hierarchies, as well as the presentation layer for the business users.

This project was suited to me because OBIEE itself works best on a true Star Schema, and because of my BI experience it was easy to convert the old Discoverer reports and include the Desktop drill-down functionality.

Apex, Oracle Discoverer, Siebel, Oracle OBIEE, SQL Developer, dimensional modelling, SQL, PL/SQL, Oracle Database 10.2, SVN, Tortoise, OWB, Ajax, JavaScript, JQuery, SAP, ABAP

-7 11.2008 – 11.2009

British Telecom
Munich

Database Analyst

Support of the leased-line management application.

Management of leased-line orders, auditing and accounting, including automatic calculation test and subsequent booking in Oracle Financials AP and GL. Sub-Module: order- and Contract

-8 02.2008 – 11.2008

DB-Architect, Consultant

Designer / Programmer

10 10.2006 – 06.2007

NETMA

management, Invoice verification, Accounting (Accruals, Invoice Accrual, claims), interface to Legacy system.

Administration of Leased Line orders, auditing and accounting. New creation of drafts/specifications/documentation for Loader, bug fixing and changes to updated business processes. Conversion of the corresponding specifications measure data Loads for Requests, orders, Contracts and Invoices into the corresponding systems by means of SQL- and PL/SQL-scripts. Data analysis with BO, SQL and PLSQL

Oracle Forms, Oracle Applications, SQL Navigator, SQL Tools, SQL, PL/SQL, Oracle Database 8i, Business Objects, Model Right, DBDesigner, Citrix Metaframe, Sourcesafe

- Developing Datawarehouse applications with owb and administering with Apex.
- The Meta Data System processes, analyses and publishes EPG data, monitors and controls the quality of incoming EPG data from third-party suppliers. Shows the MDS via process reporting and error notifications. Analyses EPG Data from several suppliers. Manage the MDS, extend the sources of EPG data via integration of data-feeds from new suppliers. MDS extracts EPG data from suppliers and consolidates it with Station Data, and Daily Tip data to provide a unified content guide to Payout and Web applications, reporting systems, and EPG customers in customised formats.
- Oracle Apex, Oracle Datawarehouse OWB
sql developer, Squirrel
SQL Manager, SQL, PL/SQL, Oracle 10g, HTML, css, XML,
Oracle Designer, Enterprise Architect, Tortoise SVC, Ajax, JavaScript, JQuery, [JIRA](#) Issue Tracking.

Developing Order/Production Management applications.

Ruby is an application which saves, maintains and processes customer orders/RFQs (Request For Quote), and to compare the customer products and plans with the navteq products and plans. Apex: Authentication, Authorisation.

Oracle Apex, Oracle Designer, sql developer, Squirrel, Toad, SQL, PL/SQL
Oracle Database 10, MS Visio, Enterprise Architect, TortoiseSVC, MS Access, Peoplesoft, Ajax, JavaScript, JQuery, [JIRA](#) Issue Tracking.

Developing Oracle e-business Suite interfaces

Support and migration of existing Forms and Reports from 6i to 10g.
